

## PRESS RELEASE

### **From low pressure to high pressure: WERNER WIRTH presents potting and plastic injection molding solutions at Fakuma 2023**

With over 25 years of solution expertise in the field of Hotmelt Molding and many years of expertise in plastic injection molding and tool manufacturing, the Hamburg-based family-owned group is showcasing itself at the Fakuma 2023, the world's leading trade show for industrial plastics processing.

Hamburg, September 2023 – Fakuma 2023 will take place in Friedrichshafen from October 17 to 21. WERNER WIRTH Group will present its solutions in the field of Hotmelt Molding, plastic injection molding and electronic component protection.

This year, special attention is paid to the 25<sup>th</sup> anniversary of Hotmelt Molding. Hotmelt Molding has been part of the service portfolio of WERNER WIRTH GmbH since 1999. What started as a customer relationship has now become a success story. Especially when the requirements are challenging and/or complex, WERNER WIRTH is a sought-after partner.

In addition to decades of know-how and manufacturing expertise in the field of component protection, the company supplies its customer-oriented solutions completely from a single source. This is complemented by a wide range of machines with extruder technology for individual requirements, in-house mold and tool construction, a global service network and proprietary software solutions for machine technology. At the trade show WERNER WIRTH showcases the Hotmelt Molding machine WW TM 4500. Visitors will be able to see the technique that protects sensitive electronics against extraordinary stresses such as temperature fluctuations, moisture, dust and vibrations.

The company's plastic injection molding and moldtool construction services will also be presented at Fakuma. In addition, WERNER WIRTH MOLTICS GmbH also offers development and design in this area. With that that the company provides a full-service solution. For customers, this means they will receive all services from a single source. From the initial first idea and its development, along with the design of innovative plastic components, to the actual mold and tool construction, and production of prototypes, small quantities, or large-scale production.

**WERNER WIRTH and WERNER WIRTH MOLTICS will present these solutions from 17 to 21 October at Fakuma 2023 in Friedrichshafen, Germany. You will find it at stand A7-7102 in hall A.**

**YOUR INNOVATION.  
OUR CHALLENGE.**

## **PRESS RELEASE**

### **Company background**

As a leading development partner in the electronics industry, WERNER WIRTH helps its customers changing the world. By combining connection technology and component protection, technologically innovative solutions are created and boundaries are pushed. In addition to supplying standard connectors and component protection materials, WERNER WIRTH offers customized solutions (e.g. connector systems for e-bike motors) and does prototype and series production – or supplies the suitable processing machines.
